SCHOOL OF
INFORMATICS AND COMPUTING

2016–17
Employer Guide

The breadth of programs in the School of Informatics and Computing results in talented students with a range of skills to fill almost any hiring need. See below for a variety of options to help you meet your recruiting goals.

SoIC Careers

Create an account in our online recruiting system, SoIC Careers (**soic.indiana.edu/soic-careers**), to connect with students through:

Career Fairs

Attending our career fairs is a great way to meet hundreds of potential employees. The School hosts two large career fairs each year; last fall, more than 1,100 job and internship seekers attended our fair.

On-Campus Interviews

If you are looking to increase your visibility with students and have a more productive recruiting season, we encourage you to schedule on-campus interviews. We offer next-day interviews following each career fair and on-campus interviews later in the semester.

Job Postings

Post full-time, internship, and part-time positions in SoIC Careers.

Information Sessions

Information sessions are traditionally held the evening prior to an on-campus interview day to provide students with more information about your company.

Tech Talks

Host a tech talk and speak to students about tech-related topics and industry trends, informing our students about the latest happenings of the tech world.

SoIC Degrees

3 undergraduate majors, 5 minors, and 30+ areas of concentration

Bachelor's degrees: computer science, informatics, intelligent systems engineering

11 graduate degrees

Master's degrees: bioinformatics, computer science, data science, human-computer interaction design, information science, library science, and security informatics

Ph.D. programs: computer science, informatics, information science, intelligent systems engineering

Plus we offer an online certificate in data science, a graduate certificate in information architecture, a specialist degree in library and information science, and numerous dual degrees and certifications.

Get to know our students

1,630 undergraduates, **1,093** graduate students

22% undergraduate females

Looking for more chances to engage our students?

Consider one of these opportunities:

HCID Connect

HCID Connect is a unique opportunity for employers to recruit students in our Human-Computer Interaction Design master's program by participating in a mini career fair, giving an "ignite-style" employer presentation, hearing from faculty, and observing students in a design challenge.

Employer Panels

Participate in an employer panel in one of our introductory computer science or informatics courses to help students learn more about your industry and company. Informing students about the many options available to them is one of the best ways to increase the tech talent pipeline.

Accelerator Corporate Giving Program

The Accelerator program is a relationship-enhancing investment opportunity that improves your company's ability to address your specific, strategic needs.

Mock Interview Day

Conducting practice interviews is an opportunity for you to provide support and feedback to our students while increasing your presence at the School.

Additional Opportunities

- Connect with faculty liaisons
- Collaborate with student organizations
- Sponsor a case competition
- Host a site visit
- Moderate resume roundtables
- Provide shadow opportunities

138 companies **recruited on-campus**
in 2014–15 through career fairs, on-campus interviews, HCID Connect, information sessions, tech talks, and student events.

1,546 interviews **were conducted on-campus**

We'd love to help you find the right students for your organization. Contact us at soiccareers@soic.indiana.edu to get started!
